VERSA-TOOL™ "LADDERLESS™" SIGN HANGING

HANG
UPS
UNLTD

Safe, "LADDERLESS™" sign/poster hanging from almost any ceiling... in minutes, without ladders!

Our basic VT Versa-Tool, installs most popular grid-ceiling fasteners on 1.0 inch wide suspended, "drop ceiling" T-Bars in just seconds... safely... without hazardous ladders.

For Non T-Bar ceilings, such as plaster, metal or wood, simply snap on Adapter to install many popular Magnetic and Adhesive fasteners. Adapter stores conveniently on Pole and snaps on and off as needed.

VTA VERSA-TOOLS include: POLE, HEAD and ADAPTER

REEL EZ "LADDERLESS™" SIGN HANGING SYSTEM

HANG
UPS
UNLTD

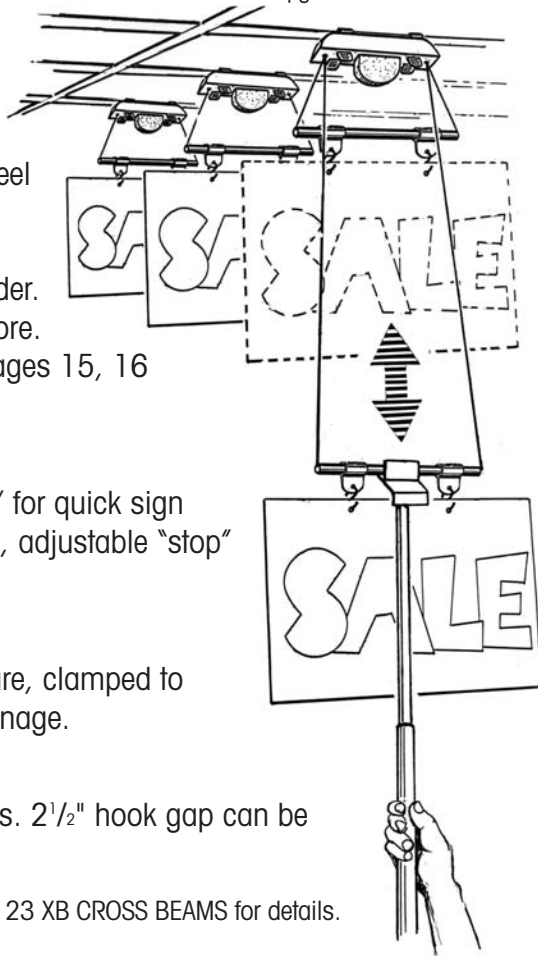

Easiest, safest, fastest way to hang & change signage. Especially cost-effective for ceilings from 10 to 18 ft. high. Holds up to 2 lbs.

*T-Bar or X-Beam: See pg 23

REEL EZ Hanger

Made of rugged, ceiling matching, white plastic. Mounts securely to T-Bar suspended ceilings with easy-to-squeeze-open spring jaws. Hanger houses a retractable cord reel suspending a 10 inch wide tube, with 2 "S" hooks. Attach directly to punched holes in your rigid signage. Retractable cord allows "bar" and sign to be lowered as much as 11 feet. 15 feet available on special order. Adjustable cord "stop" provides level, uniform sign height throughout store. For non-rigid, paper type posters, please see "POSTER HOLDERS" on pages 15, 16 and 17, for many other compatible sign hanging options.

Telescoping Pole

3-section aluminum pole extends up to 10 ft. Plastic head lowers "bar" for quick sign changeover, then raises and levels sign easily to predetermined, on-site, adjustable "stop" height. Functions similar to a window shade.

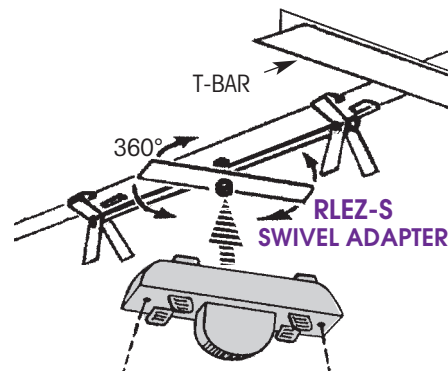

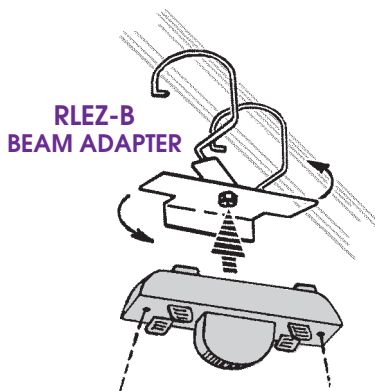

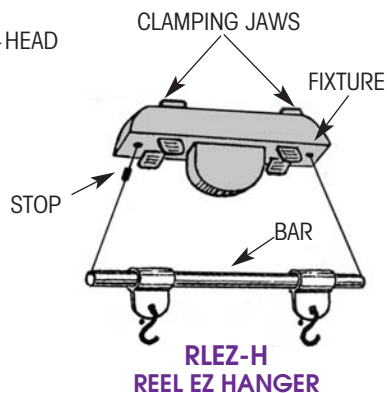

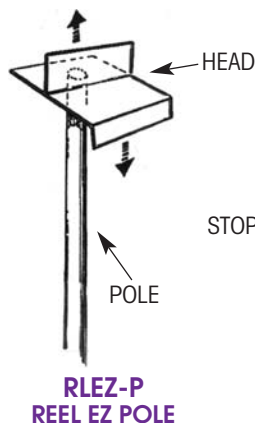

Sign Swivel Adapter

Outrigger squeeze clamps lock SWIVEL securely to T-Bar. Reel EZ™ Fixture, clamped to central pivot Bar, provides 360° optimum viewing angle of attached signage.

Beam Adapter

For non-T-Bar ceilings, provides mounting from ceiling beams and pipes. 2 1/2" hook gap can be hand bent up to 4". Swivel-plate allows 90° rotation of Reel EZ Fixture.

*Note: For pin-point positioning of Reel EZ Fixture, from T-Bar ceilings, please see page 23 XB CROSS BEAMS for details.

TYPICAL APPLICATIONS

CABLE "END" STYLES:

HOOK END 'H': New, heavy duty, Safety Hook Assembly, 1/4" dia. steel x 27/8" Lg. hook, accepts material up to .350 dia. Includes Gripper (pg.9) to adjust 65" Lg x 2 mm Stainless Steel cable to any length.

LOOP END 'L': Most popular cable assembly available. Best for connecting to ceiling T-Bar Hooks, 'S'-Hooks, etc. Strongest: Full Cable Strength.

BARB END 'R': New! Pat. appl. Eliminates need for panel 'S'-Hooks. Fast installation. Cost effective. Requires 1/4" dia. panel hole. Great for aluminum & Sintra panels.

BALL END 'B': Used primarily with PHX Signtrak. Adaptable to any 1/8" wide slot.

STOP END 'P': Cheaper than 'Ball End.' Has similar applications. Provides hidden attachment look. Copper.

EYE END 'E': Compact fitting is ideal for wire type T-Bar Fasteners and 'S' Hooks.

SLEEVE END 'S': Loose fitting for field installed applications where final cable length is not known. Professional cable cutter and sleeve crimper available below. Zinc plated copper.

Caution: Mounting surfaces vary considerably; always test for your application. These are considered permanent magnets, but over time magnets may lose effectiveness. Test frequently to determine if sufficient power still remains. "Holds up to" is a relative measurement of strength based upon the ideal material (1/4" steel plate) under laboratory conditions. All magnets have steel cases except MAS and MAL.
